

01 / READ WITH A QUESTION

Reading with intention

让每一次阅读都有明确的问题

A useful reading session leaves a trail: a question, a passage, your own explanation, and one next step. This two-page guide is an original demonstration for a local PDF reader.

这是一份原创演示文档，用来体验搜索、高亮、批注和双语笔记。它不报告真实实验，也不代表任何论文的研究结论。

1. Set one question

Before opening a paper, write one question you want the text to help answer. Keep it narrow enough to revisit after reading.

阅读前先写一个具体问题。读完后再次检查：哪些内容真正回答了它，哪些仍然不确定？

2. Highlight with a purpose

Select a short passage, then add a comment explaining why it matters. A highlight becomes useful when it points to your reasoning.

选中一小段文字并高亮，再写下它的重要之处。批注可以记录疑问、适用条件，或需要核对的证据。

TRY IT

Highlight: "A useful reading session leaves a trail"

练习：为一句话加批注，说明你为什么选择它。

02 / TURN EVIDENCE INTO UNDERSTANDING

Write it in your own words

用自己的话，把理解留下来

3. Keep two languages side by side

Write a Chinese explanation in the left note column and an English version in the right. They can express the same idea without being literal translations.

中文栏帮助你把逻辑说清楚，英文栏帮助你整理准确表达。两栏由你手动编辑，内容完全保存在本地。

4. Ask about the conditions

For an analog-circuit reading exercise, search for phase margin. Then record what definition, operating point, and model the author used before comparing any number.

在模拟电路阅读练习中，可以搜索“相位裕度”。比较数值之前，先记录定义、工作条件和模型假设。本示例不提供任何器件的性能数据。

5. Export a useful reading record

Export the notes as Markdown. A helpful record keeps the source filename, page references, selected quotations, and your own comments together.

导出的 Markdown 可以保留原始文件名、页码、所选原文和你的批注。导出前检查笔记是否已经保存。
